PROJECT STRUCTURE

Project name	Developing a flight delay prediction model using machine learning.
Team ID	PNT2022TMID37576

The project folder contains the following folders

- flightdata.csv is the dataset used for training our model.
- flight delay Flight_Delay.ipynb is the python file where the ML algorithm is applied to the dataset for testing and training. Finally, the model is saved for future use.
- flight.pkl is the saved model used in the flask to predict the output instantly for the given inputs.
- To build a Flask Application, save HTML pages in the templates folder and a python script app.py for server-side scripting.
